

15" LCD Monitors

High quality rack-mount LCD monitors designed to maximize space.

As floor space in the datacenter environment becomes more expensive and more difficult to allocate, datacenter managers require solutions that allow them to maximize space in their racks and enclosures. A traditional CRT monitor, monitor shelf, keyboard, and keyboard drawer require between 11U and 13U of rack space. The slim design of MACASE rack-mount LCD monitor/keyboard/mouse drawers offer the same functionality while utilizing only 1U (1.75") of rack space. By saving as much as 12U of free space, more room for servers and networking equipment is made available.

Features & Benefits

Convenience

1U of rack space	Occupies only 1U of rack space compared to the 10U to 13U of space required by a traditional CRT monitor
TFT active matrix screen	TFT active matrix technology provides for a high quality, flicker-free display
Keyboard & Mouse	A keyboard with 88 full travel keys quality feel and unique touch pad for convenience point device
On-Screen Display (OSD) adjustments	User control buttons on the front of the LCD display allow for adjusting the characteristics of the image. User controls include: auto adjust, exit, brightness, menu, and a power indicator.
Energy Saver	This LCD monitor is EPA Energy Star compliant which reduces energy costs by automatically switching into a low power mode after a user specified amount of time
Standard VGA connector	The LCD monitor connects to a server or KVM switch via a standard VGA connector
PS/2 terminations	The keyboard and touch pad connect to a server or KVM switch via standard PS/2 connectors

Adaptability

1024 X 768 Maximum Resolution	0.297mm dot pitch, 1024 x 768 resolutions provides exception image quality for most server applications. Full screen support for lower resolutions is also provided.
-------------------------------	--

Protection

Steel Construction Warranty	Solid steel construction with ball bearing sliding rail provides for increased durability and easy usage. Auto switch off when the panel is not in use. 2 years limited warranty.
